Erastus Wiman's son, Harry Dunn Wiman, a reporter, sat beside his father before Justice Ingraham in the Court of Over and Terminer this morning when Assistant District-Attorney Francis L. Wellman, the most formidable and most relentless of the county's prosecutors, told the jury the story of the alleged rime of Erastus Wiman.

Mr. Wellman described forgery in the second degree, for which a convicted person may be consigned to prison for

Erastus Wiman, a man of three score ears, who has attained a reputation that extends all over America, is charged with the simple crime of drawing a check on his firm, R. G. promise effected at Columbus yesterday.

W. P. De Armitt, President of the New York and Cleveland Gas Coal Company, says his Company will not agree to the compromise, as the Company has all its contracts made on a 55-cent rate. If his men will agree to make good the loss, resumption will be had next week.

Organizer Harris, of the Clearfield District, says he is not satisfied with the Columbus agreement, and does not see why the miners should accept it. He thinks the miners in his district will refuse to abide by it.

It is thought that the New York and Cleveland Gas Coal Company, Imperial Coal Company, Osborne and Saeger and Chartters Block Coal Company, will make a fight against the 69-cent rate, but that they will eventually be compelled o succumb.

MINERS THREATEN TO MARCH

More Trouble Expected in Kewanee District.

Associated Press. SPRING VALLEY, Ill., June 12.-The miners of this district are out of patience with the Kewance miners, and are preparing to march on that place today, regardless of reports of settlement. Committees were sent yesterday afternoon to Oglesby, La Salle, Seatonville, Ladd and Lacey to get the men to go in. There is no doubt but that they will, and by this afternoon at least 4,000 men will be prepared to move from this city.

Texas. Frof. Hugo, of Fort Worth, has signed a contract to walk 1,000 miles on steel rails of the railroads, to average not less than twenty miles per day, for \$5,000. He started from Fort Worth four days ago, and arrived here late yesterday afternoon. He goes to Galveston and from there back to Chirago, via Dallas. He left this morning for the South.

Verrelli and some of the dead man's friends, of whom a half-dozen called at the station-house this morning, are not satisfied with the theory that he died of hemorrhage. They think he was sandbagged and robbed.

One of the friends, Joseph Gerrutti, who keeps a cigar store at 331 East One Hundred and Fifteenth street, said Marino called at his house yesterday afternoon and again in the evening.

Marino, he sail, had a fit of coughing, and he save him a glass of wine. The dead man was not again seen by any of his friends after leaving Gerrutti's house.

The body was taken to avallarment.

As Mr. Dunn's prophetic reputation rested on sustained heat, this expression of opinion brought him out vigorously.

"It is not and cannot be much cooler." he said. "At 8 o'clock yesterday morning the temperature was f5 degrees, and at the same hour this morning it is 72. There is a difference of but 3 degrees, and that is offset by a reduced velocity of wind, which is only five miles an hour yesterday. You will find it quite as warm and uncomfortable to-day as yegterday. The only point in to-day's favor is that the humidity is five per cont. less then midity is five per cent, less than yester

midity is five per cent, less than yester-day at this hour."
This data is incontrovertible, but it is fair to say that the great New York public turning out for the day in the early hours found the weather more bearable than it was at corresponding hours a day before.

A foslike haze hung over the city. Mr. Duna says that this was not cloud, but dust and smoke particles that will occasionally group together in cloud effects. "If you happened to live in such places

dust and smoke particles that will occasionally group together in cloud effects. "If you happened to live in such places as Cincinnati, St. Louis or Chicago, where they burn soft coal extensively; said he, "you would get used to haze. It is a common condition during their heated terms."

The haze had a curious effect upon the appearance of the sun during the morning hours.

On days so lowering and dark as this the sun is usually not to be located at all unless it may be a vaguely formed bright spot on the gray canopy. This morning, however, the orb of day was clearly to be seen, much more clearly, in fact, than upon a cloudless day. It shone through the vapors round and ruddy and sharply defined, like the full moon when low in the heavens. The eye could be easily kept upon it, as the mist had the incllowing effect of smokel glass. The darkened areas upon its surface, commonly called sun-apots, could be faintly traced and altogether the great luminary beamed upon us with an expression of countenance seldom assumed towards mundane mortals.

Here is Mr. Dunn's statement of the condition of things throughout the country at 8 o'clock this morning:

The temperature was high and almost stationary in all parts east of the Missouri River, except over the lake regions and in New England States, where it was slightly cooler. It remains cool in the Dakous Montana, Wyoming
